## Guide to 'Sustainability Approaches'

<b>Engagement</b>	The fund's primary way of trying to achieve sustainable outcomes is by engaging with their portfolio companies to try and improve their sustainability practices.
<b>ESG-weighted</b>	The fund aims to invest into companies that have a better or improving sustainability profile across environmental, social and governance (ESG) issues than the sector average.
<b>Exclusions only</b>	The primary approach to ethical and sustainable issues is by excluding companies involved in certain business activities such as the manufacture of weapons, tobacco or gambling.
<b>Investing in solutions</b>	The fund primarily invests into companies that are actively contributing to positive outcomes for the environmental and/ or society through the products and services they provide.
<b>Low carbon</b>	The fund invests into companies that have a lower carbon footprint than the sector average, are actively reducing their carbon footprint, or are contributing to solutions aiming to reduce carbon emissions.
<b>Low carbon &amp; ESG-weighted</b>	A combination of both 'ESG-weighted' and 'Low carbon' approaches.
